Background Information

DegreeWorks uses GEC attributes to determine which courses get placed into each objective. Since each GEC course can meet more than one objective, DegreeWorks may sort your GEC courses differently than you would at first.

What should you do?

Seniors—If you are a graduating senior and your GEC block is not checked off in DegreeWorks because of a sorting error, contact your advisor. They can help you request an exception to move the necessary GEC courses into place.

Undergraduate Students—
No action is required. Continue taking the GEC courses that you and your advisor have planned, and your GEC block in DegreeWorks will sort itself out.
